LEADERSHIP

John Driver, CEO of Lynx Technology, is a business strategist and change agent with broad and diversified experience in large mid-market, and early stage software companies. He has successfully grown Lynx organically and through several strategic business acquisitions. An active member of the community, he is a NACD Governance Fellow, Vice-Chair of the Board of Trustees of the Fleet Science Center in San Diego and President of the Stanford Multicultural Alumni Club of San Diego and recipient of the Stanford Governor's Award for exemplary and long-standing volunteer service to Stanford University.

HISTORY

In March 2015, tech business veteran John Driver acquired the software business of wireless multimedia software company PacketVideo (founded 1998) and created Lynx Technology. He expanded the product portfolio to include media server technology and application/API development, and transitioned to support the growing demand for subcontract support of prime government contracts. Lynx's mission is to leverage the company's expertise to help organizations deliver transformational technology solutions for their customers. Lynx Technology is based in San Diego, California with customers in North America, Europe and Asia.
